REMARKS

This amendment is offered in response to the Office Action of December 19, 2002.

It is respectfully submitted that this amendment will require neither a new search nor substantial reconsideration.

The Office Action rejected Claims 1-3 under 35 U.S.C. §103(a) as obvious over the Yeager reference (U.S. Patent No. 5,823,933) in view of the Ouchi reference (U.S. Patent No. 6,068,585).

Claim 1 has been amended to clarify to include the step "attaching discrete sections of zipper profile oriented in the machine direction ..." which is quite different from the Yeager reference which discloses the sections of zipper profile attached in the transverse direction.

It is therefore respectfully submitted that Claims 1-3 are patentable over the cited art.

For all of the reasons above, it is respectfully submitted that all of the presently pending claims are in immediate condition for allowance. The Examiner is respectfully requested to withdraw the rejections of the claims, to enter the amendment, to allow the claims, and to pass this application to early issue.

Respectfully submitted,

Gerald Levy

APPENDIX

In the Specification:

Please amend the second paragraph of page 1 as follows:

In the Claims:

Please amend Claim 1 as follows:

1. (Amended) A method of forming a zipper bearing carrier web comprising the steps of: advancing a first continuous strip of carrier web in a machine direction; and

attaching discrete sections of zipper profile <u>oriented in the machine direction</u> at predetermined spaced intervals to said first continuous strip of carrier web to form a supply of carrier web with pre-positioned sections of zipper profile.
